### Tariff Information:

The Smart Green Electric 1.0 tariff has been designed understanding that every customer is different. If your weekly schedule is varied or you find you can use your energy at any time of the day, this is the tariff for you!

This tariff is electricity only. Please check out our alternative “dual fuel” (electricity and gas) tariffs if you need to switch both at the same time.

#### Convenient:

All USIO tariffs are smart so we will need to install a smart meter in your home, but do not worry the costs of doing so are already included in your tariff. No more need to send us your meter readings!

After signup and live date (which is usually 21 days from the point you sign up with us) we will then organise a convenient appointment to fit a smart meter, replacing your own meter at the same point your old meter was attached to your system.

#### Support:

UK based customer support team with an Online Portal to easily view your billing and update your details.

**Payment:**

Payment by Monthly Direct Debit
